CURRICULUM VITAE FOR ALTERNATIVE HEALING TECHNIQUES

Background:

In 1988 Ted contracted a serious lung problem that rendered him so ill he could not walk more than ten paces before having to stop to catch his breath. After seeking medical opinions and help from every professional he could find, he turned to alternative methods to recover his health. Ever since that time his initial interest in alternative health techniques and spirituality developed into his present passion for healing and helping others to heal themselves and become more present.
